

Ahsanullah University of Science and Technology

CSE 2200 Software Development – III Fall 2019

Offline 1

- A)** Install Android Studio along with Virtual Device. Take screenshots of installation along with your pc name. Paste the pictures in a document and create a PDF.
- B)** Learn only the **xml syntax** of the following UI Control views. Design and create a project in android studio with these views. You have to create only the user interface using **activity_main.xml** file. No need to show connection with java. Also design something meaningful like a questionnaire.
- I)** EditText
 - II)** CheckBox
 - III)** RadioButton
 - IV)** RadioGroup
 - V)** ToggleButton
 - VI)** Spinner
 - VII)** TimePicker
 - VIII)** DatePicker
 - IX)** Toast
- (No need to use buttons to show toast, just show a simple toast message when app in executed. See the 2nd link for reference.)

Recommended Website:
