CSE 2200 Software Development – III Fall 2019

Assignment 2

Learn how to use the following Layout Designs and create a small individual project in which there will be **4 or 5 Activities** connected with each other by buttons or any other widget of your choice. In each activity use one of the following layout designs to show text or image or anything of your choice. Try to design something meaningful.

- I) Relative Layout (reference: [video links](#) , [website link](#))
- II) Table Layout (reference: [video links](#) , [website link](#))
- III) Frame Layout (reference: [video links](#) , [website link](#))
- IV) Absolute Layout (reference: [video links](#) , [website link](#))

Submission Procedure:

- Each Student will get 13 days to complete this assignment.
- Submission will be taken through [GitHub](#). Upload your assignment through your own GitHub ID. Copy the project repository link. There will be a post for your lab group offline 2 submission. Paste the link in that particular post and turn in your submission.
- Deadline for each lab group will be posted in google classroom.
